econometrics specifically written for finance students. Key features:

- Thoroughly revised and updated, including two new chapters on panel data and limited dependent variable models
- Problem-solving approach assumes no prior knowledge of econometrics emphasising intuition rather than formulae, giving students the skills and confidence to estimate and interpret models
- Detailed examples and case studies from finance show students how techniques are applied in real research
- Sample instructions and output from the popular computer package EViews enable students to implement models themselves and understand how to interpret results
- Gives advice on planning and executing a project in empirical finance, preparing students for using econometrics in practice
- Covers important modern topics such as time-series forecasting, volatility modelling, switching models and simulation methods
- Thoroughly
