ECE: Advanced Information and Network Security Homework 2 Fall 2012 1. The ciphertext 75 was obtained using RSA with  $n = 437$  and  $e = 3$ . You know that the plaintext is either 8 or 9. Determine which it is without factoring  $n$ . Solution: The two possible plaintexts are 8 and 9. Encrypt each to get  $8^3 \pmod{437} = 75$  and  $9^3 \pmod{437} = 292$ . Hence, the correct plaintext is 8.

Course Outline This course is an introduction to the broad field of information security. We will cover both computer security (including such topics as security policies, access control, viruses, etc.) and network security (such as protocols for maintaining confidentiality of email or for secure web transactions). Note that there is not always a clear dividing line between the two areas.
