This book discusses recent developments in the study of chemical processes and equilibria in the marine environment and in the air/water and water/sediment interfaces. The chemical cycle of carbon as well as the effect of organic substances on the speciation and distribution of inorganic and organometallic substances are extensively discussed. Much of the recent progress in the area is the direct result of advanced analytical technologies and chemometric applications which are highlighted in the book.

This book presents a personal account of a Syrian woman's youth in the Suq Saruja (old city) of Damascus in the first half of this century. Author Tergeman wrote the original memoir, Ya Mal al-Sham, in Arabic to preserve the details of a genuine Arab past for Syrian young people and to help them appreciate the architecture of the old quarter with its reminders of earlier values.
