"The Second Edition of Psychodynamic Perspectives on Aging and Illness is a timely and superb revision which offers health-care professionals working at the mind/body interface a paradigm shift. For far too long, the wisdom of psychoanalysis as a tool to understand the suffering inherent in aging and illness has been devalued and neglected.

Two major theories explain the psychosocial aspects of aging in older adults. Disengagement theory views aging as a process of mutual withdrawal in which older adults voluntarily slow down by retiring, as expected by society. Proponents of disengagement theory hold that mutual social withdrawal benefits both individuals and society.
