~~The Nervous System Lets Explore Science Life Science~~

The nervous system is made up of the Cns(central nervous system) and the PNS(peripheral nervous system).The nervous system works together with all of the other systems including the digestive system, the respiratory system, and the immune system. Without the nervous system, none of the other systems would be able to function. The brain tells all of the systems what to do. The brain tells the digestive system when it needs nutrients and it also tells the immune system when to prepare to ...
